

ALUTREND® WE STOP DIRT AND MOISTURE AT THE ENTRANCE!

Entrance matting systems are expected to remove dirt from shoe soles, wheels of shopping carts, wheelchairs and baby carriages.

The cleaning of a building succeeds in 80 % of the cases on the floor, so it is not indifferent how much dirt is being carried inside through the shoe soles. An effective entrance matting system cleans 96 % of the dirt.

SOLUTIONS FOR HIGH, MEDIUM AND SMALL TRAFFIC BUILDINGS

Since 2006, ClearTex Ltd. has been designing, developing, manufacturing and implementing outdoor, indoor and intermediate zone versions of ALUTREND® aluminum matting systems, for high, medium and small traffic entrances. The standard units are available with rubber, brush and textile inserts.

INTRODUCING THE NEW AluTileMat® MODULAR ENTRANCE MATTING SYSTEM

MODULAR, ALUMINUM PRODUCT LINES CREATE YOUR OWN DESIGN!

Our new creative innovation the AluTileMat® modular aluminum entrance matting system offers unlimited freedom for architects and designers to plan impressive, inviting entrances, that never seen before. In the modules wide range of textile inserts can be integrated which generate an endless number of variations.

STANDARD MODUL VARIATIONS

The thicker type "Mini" fits for medium-traffic buildings, office buildings, shopping malls, industrial facilities and other public buildings.

The thinner "Compact" is a solution for buildings with smaller traffic and even for family houses.

8 MAIN ADVANTAGES

- ◀ Durable aluminum profiles, unique, variable design
- ◀ Wide range of customizable modules and colour options
- ◀ Easy to plan, no extra survey time and cost
- ◀ Ready-to-use modules, practical to storage and transport
- ◀ Fast-flooring system, quick and easy to install and maintain
- ◀ Easy clean and repair, damaged elements are replaceable
- ◀ Made from regenerated aluminum and polyamide parts
- ◀ 5 years warranty
